

BoonDocker

PERFORMANCE

Air Density Advantage™

Boondockers Air Density Advantage is now available for Turbo-Charged Arctic Cat, Polaris, and Yamaha Snowmobiles.

Air Density Advantage:

Allows the BoonDocker Fuel Management Box to adjust fuel delivery as air density changes.

What does this mean to you?

Less adjusting for the end user.

Combine this with the new percentage based turbo programming and you can set it and forget it.

Upgrade available for existing turbo owners!

**Available Spring 2008
For all Turbo-
Charged Applications!**

Don't be left behind
